

## PREMIUM ASPHALT EMULSION SEALER

Jennite Asphalt Emulsion (AE) is a concentrated, polymer modified asphalt emulsion specifically formulated as a weather protective, water resistant coating over the asphalt pavements of airports, parking lots and driveways.

The Jennite Surfacing System offers protection that no other product or contractor can provide: a written dual performance warranty.

*Preserve Your Investment with  
the Best Protection Possible -  
The Standard of Excellence  
Since 1938.*

### • ADVANCED FORMULA

*Extremely durable due to its polymer fortified resin and fiber reinforced, high solids formula.*

### • PREVENTS OXIDATION

*Protects against the drying action of the sun. Reduces raveling, cracking and deterioration.*

### • COMPATIBILITY

*Made from an asphalt resin binder which is more compatible with new asphalt pavement. Does not promote hairline cracking.*

### • LUSTROUS BLACK FINISH

*Restores a clean, new look.*

### • ENVIRONMENTALLY FRIENDLY

*Contains no harsh chemicals, no coal tar, no odor and has low VOC's and PAH's.*

## No Other Pavement Sealer Lasts Longer - Dual Protection Warranty:

*Neyra Industries works in partnership with our licensed Jennite contractors to offer you this unique protection: the manufacturer warranties the product and the contractor warranties the installation. Only Jennite trained and licensed contractors can buy and apply the Jennite Surfacing System. Neyra Industries delivers a Certificate of Authenticity with every Jennite shipment.*

**Rely on our many years of experience for expert guidance in choosing the best pavement management solution for your property. Jennite delivers the longest lasting asphalt pavement protection with the lowest annualized cost as well as the advantage of being a fully deductible maintenance expense.**
