## EPOXY FORTIFIER FOR ASPHALT EMULSION

Maxum is a water-based polymer-latex additive designed as a fortifier for PaveShield, an asphalt emulsion pavement sealer. PaveShield fortified with Maxum will exhibit superior durability and greater resistance to power steering marks, chemicals and fuel than unfortified pavement sealers.

## FASTEST. TOUGHEST. LONGEST.

### • TOUGHENS COATING

*Superior bonding stops sand roll-out, scuffing and power steering marks.*

### • BEAUTIFIES

*Improves sand suspension and ensures workability for an even-textured, rich, black durable surface.*

### • ENHANCES RESISTANCE

*Reduces scuffing and tearing and creates a uniform, darker, slate black color of the finished coating.*

### • QUICK ACCESS

*Makes coating more oil and gasoline resistant.*

### • SLIP RESISTANT

*Even texture and better grip for safer driving conditions.*

## Fast Drying Technology for Superior Sealcoating Performance - MAXUM

*Maxum, when added to PaveShield, will make the dry coating blacker, tougher and more resistant to higher traffic loads and scuffing. It is especially recommended in applications where initial toughness is critical due to high traffic volume and/or the need for immediate use of the pavement.*

Neyra Industries has been a leader in the pavement maintenance industry for over three decades. It is our passion to develop high quality products that exceed industry standards. Maxum and other Neyra products are available nationally at our plants and through distributors and contractors.
