

SunShield™

SOLAR REFLECTIVE COATING

SunShield solar protective coating is a premium quality, highly pigmented, polymeric surfacing system designed for heat reduction of parking surfaces. The product is formulated with infrared reflective pigments to reduce solar absorption, increase reflectance and achieve the desired solar reflectance index (SRI).

SunShield binds specifically graded sub-angular aggregate for non-slip performance and to achieve a diffuse reflective surface. SunShield contains no PAHs and has an extremely low VOC content.

Custom Colors

Light Gray SRI: 50		Gray SRI: 38	
Slate SRI: 25		Beige SRI: 30	
Khaki SRI: 38		Sandstone SRI: 35	
Red SRI: 22		Sky Blue SRI: 33	
Green SRI: 33			

Contact Neyra
for additional
information.

HIGH PERFORMANCE

- Premium polymers and virgin aggregate create a tough and flexible coating. Lasts up to five times longer than conventional emulsion pavement sealers.

SUSTAINABLE

- Keeps the pavement cooler, prolonging its life.

NON-FADING

- Pure inorganic reflective pigments provide rich, long-lasting color for years of service.

WARRANTY PROTECTION

- Neyra and our national network of licensed contractors provide a two-year dual warranty.

LEED COMPLIANT

- Formulated to meet LEED "High Albedo Coatings" solar reflectance requirements.
